

Par◊Fit™ Elements
Competitive Interchanges

An extensive range of competitively priced Parker quality replacement filter elements. Par-Fit interchange elements allow the users to acquire all their replacement elements from one quality source regardless of the original equipment manufacturer.

Par-Fit competitive interchange elements must conform to all the same rigorous tests as the standard Parker replacement elements. The elements meet or exceed all specifications for the following tests:

ISO2941	Element Collapse/Burst Resistance
ISO2942	Fabrication Integrity
ISO2943	Material Compatibility
ISO3724	Flow Fatigue Resistance
ISO4572/ISO16889	Multipass Test

In addition to price and quality, the range of interchange elements available is key to a successful program for the user. Parker has worked diligently over the years to develop a range of elements that will meet this challenge.
